Xenofon Rafail Papadopoulos (Embedded Software Engineer)

xinipap@gmail.com | (+30) 6983619006 | Thessaloniki, Greece | GRxeno | Personal Portfolio | xenopap

ABOUT ME

Embedded Software Engineer with 4+ years of experience in C/C++ development for embedded, automotive, biomedical, and aerospace-related systems. Strong background in firmware development, unit testing, and compliance with industry standards (MISRA, ECSS). Experienced with STM32, FreeRTOS, Linux-based development, and CI/CD pipelines. Currently working on EDA software at Siemens DIS (Altair), with a strong interest in space and high-reliability systems.

EXPERIENCE

Software Developer @ Siemens EDA (Altair) in Thessaloniki, Greece — May 2024 to Present

- Maintain and modernize Electronic Design Automation (EDA) software using C and TCL
- Collaborate in Agile development environment using Git, Jira, and CI/CD pipelines
- Contribute to reducing design iterations and time-to-market through software optimization
- Improve performance and reliability of tools used by electronics industry leaders

Embedded Software Developer @ Kenotom in Thessaloniki, Greece — Aug 2021 to Mar 2024

- Developed embedded firmware in C for NAND flash memory controllers
- Participated in design, implementation, and testing of new firmware features
- Performed unit testing and verification for biomedical, mission-critical systems
- Contributed to automotive embedded software development for OEM projects using C++
- Worked with MISRA compliance, debugging, and validation processes
- Collaborated with cross-functional teams across multiple projects

VOLUNTEERING

Embedded Software Developer @ SpaceDot in Thessaloniki, Greece — Aug 2023 to Aug 2024

- Developed open-source On-Board Computer (OBC) software for CubeSat missions
- Designed and implemented mission-critical embedded software for satellite subsystem management
- Conducted hardware and software testing for reliability
- Ensured compliance with space software standards (ECSS)
- Collaborated with multidisciplinary engineering teams

SKILLS

Programming Languages (Concurrent years of working experience):

C (4.5 years) | C++ (1.5 years) | Python (1.5 years) | C# (1 year)

Embedded & Systems:

STM32 | FreeRTOS | Firmware Development | Debugging (GDB) | MISRA Compliance | ECSS Standards

Software Development Tools:

Git | CMake | GCC | Google Test | cppcheck | CI/CD | Jira | Confluence | VS Code | Linux | WSL

EDUCATION

Mechatronics Engineering @ AKMI VET Institution — Aug 2024 to Present

Integrated MSc Computer Science & Engineering @ University of Ioannina — Aug 2017 to Jun 2023
